Worldwide Chauffeured Services

THOROUGH CLEANING

Vehicles go through a cleaning cycle using a **Emist Electrostatic Sprayer** and a Hospital Grade disinfectant. All common areas and high-touch areas like arm rests, door handles, lavatories, seatback screens and seat belts are wiped down and disinfected between trips by chauffeurs while wearing PPE and gloves.

OPEN WINDOWS

Where practicable, it is recommended to open the vehicle windows to minimize potential exposure.

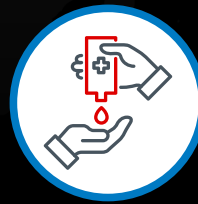

DAILY SCREENINGS

All chauffeurs and office staff will be screened daily based on CDC and Department of Health recommendations. Temperature checks are administered to each employee before their shift.

REQUIRED PPE

All chauffeurs shall use PPE as required by Local, State and CDC recommendations. This includes face masks and gloves.

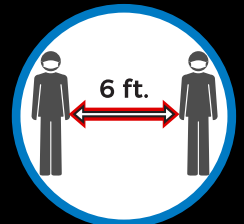

HAND SANITIZER

Hand sanitizer or wipes will be available to all chauffeurs and guests. All other material in the rear seating area such as newspapers, bottle water, mints and literature have been removed but are available upon request

SOCIAL DISTANCING

All chauffeurs and office staff are practicing social distancing.

PROTECTIVE BARRIERS

A limited number of sedans and SUV's have protective barriers installed to further insure protection between the passenger and the chauffeur. This feature must be requested and is based upon availability.
